

PHOTO ESTIMATING GUIDE

To write you an estimate, we need the following photos...

VIN LABEL

- This label is located inside the driver door jamb (see picture below) and is usually just a bit larger than a credit card.
- You'll know it's the vin label by the 17 digit vin number on the label. It also tells us the production date and the color code for your car

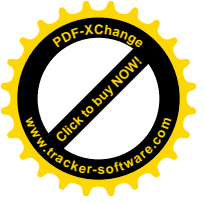

ODOMETER (MILEAGE)

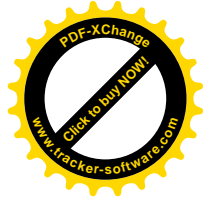

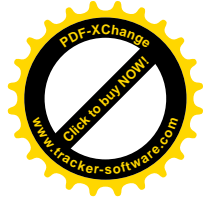

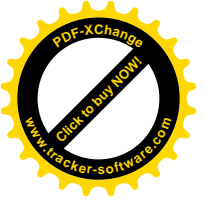

REAR OF CAR (INCLUDE CLEAR LICENSE PLATE AND EMBLEMS / BADGES ON TRUNK)

4 CORNERS OF THE VEHICLE

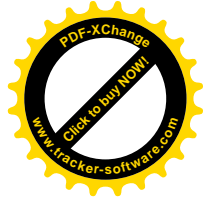

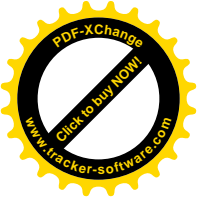

PHOTOS OF THE DAMAGED AREA (PLEASE STAND APPROXIMATELY 5 – 6 FEET AWAY FROM THE CAR)

- This particular car has a dent on the hood on the passenger side near the fender

Please note that we do not need the photo quality / file size of your photos to be too large. Generally we recommend using the lowest quality photos your phone or mobile device can take.
